

TRAINING

Level 2 Online

Course Description

This ONLINE Level 2 training course provides a broad overview of the types of material used in reinforced-hybrid pitches and their maintenance. The main requirement to maintain a successful playing surface is having a good knowledge and understanding of turf culture principles and how to apply them in specific situations.

What will you learn?

- The purpose of reinforced-hybrid materials.
- How reinforced-hybrid surfaces can be categorised and types available.
- Surface performance: Looking at a quality-safety-usage-inputs matrix.
- The need for safe working practices.
- How to identify turf grasses in general.
- General control methods for undesirable organisms.
- Rootzones, Air-Filled Porosity and Layering.
- Pitch maintenance considerations.

Is this training course suitable for me?

The course is designed to be of equal benefit to the person currently working on these types of pitches, someone aspiring to work on them, or for someone who wishes to gain a better understanding of them.

What can I do after this course?

Explore a range of options from 1-day training courses to full online qualifications which are recognised by your relevant national governing bodies.

Reinforced-Hybrid Pitch Maintenance

Benefits

You will become part of the growing network of sports turf experts and volunteers. You will gain valuable and applicable skills.

You will enjoy a fun, informative, and productive course – with content from excellent and knowledgeable experts.
